

FIBERGLASS INSTRUMENT SHELTERS

NEMA 3R
Corrosion Resistant
Seamless Construction
Integral Floor
Insulated/Non-Insulated Models

Models are fully insulated to provide complete security and weatherization for expensive instrumentation and sampler systems.

DESIGN FEATURES

- **Easy Access** - Gull wing doors lift up and out of the way to allow unhindered access to the top and front of the instrument.
- **Equipment Security** - Stainless steel hinges and lockable "T" handles protect internal sampler and instruments.
- **Single Piece Integrity** - Shelter and cover are each molded as a single unit with no external seams or welds. Floor is integral with sides.
- **Sandwich Construction** - Insulated model uses 1" polyurethane foam core between fiberglass reinforced polyester skins.
- **Integral Floor** - Insulated floor with raised threshold provides protection for expensive samplers and instruments against moisture picked up from concrete floors and water infiltration.
- **Weatherization** - Weathertight seals protect against moisture. Screened fans and vents prevent access for rodents and insects. Heater maintains temperatures.
- **Low Maintenance** - Rugged trouble free structure resists scarring or abrasion. Smooth exterior gelcoat surface makes cleaning easy and protects against biological contamination.
- **Finish** - Standard exterior finish is a smooth, white gelcoat. Optional colors include: grey, green, brown, or tan.
